Professional Summary

Computer Science graduate with hands-on experience building web applications using Python, Django, Django REST Framework, and Java Spring Boot through academic and personal projects. Familiar with REST API development, relational databases, Git, HTML, CSS, JavaScript, and basic AWS services. Passionate about backend development and eager to learn, contribute, and grow as a Software Engineer.

Technical Skills

Programming Languages: Python, Java, JavaScript, SQL

Backend: Django, Django REST Framework, FastAPI (Basics), Spring Boot, REST APIs

Frontend: HTML5, CSS3, JavaScript, React.js

Database: PostgreSQL, MySQL

Cloud: AWS EC2 (Basics), AWS S3 (Basics), Render, Vercel

Version Control: Git, GitHub

Tools: VS Code, Postman

Core Concepts: OOP, REST APIs, SDLC, Data Structures & Algorithms

Projects

Booking Hai – Multi-Business Appointment Booking Platform *Django | Django REST Framework | PostgreSQL | HTML | CSS | JavaScript | Vercel | Render | Neon PostgreSQL*

bookinghai.vercel.app

Aug 2026 – Present

- Built a multi-business appointment booking platform for salons, clinics, gyms, tutors, and other service providers.
- Developed the backend using Django and Django REST Framework by building REST APIs for user authentication, appointments, business management, customers, and services.
- Designed and managed the PostgreSQL database using Django ORM and implemented CRUD operations for different modules.
- Implemented user authentication, appointment scheduling, business profiles, customer management, and role-based access control.
- Built responsive frontend pages using HTML, CSS, and JavaScript and integrated them with backend APIs.
- Used Git for version control and deployed the frontend on Vercel, backend on Render, and PostgreSQL database on Neon.

Negeinno – Startup & Business Networking Platform *Spring Boot | React.js | PostgreSQL*

negeinno.com

Jan – Aug 2026

- Developed backend features using Spring Boot following a layered architecture with Controllers, Services, Repositories, Entities, DTOs, and REST Controllers.
- Built REST APIs for user authentication, startup profiles, networking, messaging, posts, and user interactions.
- Used Spring Data JPA with PostgreSQL to manage database operations and entity relationships.
- Developed reusable React.js components and integrated them with backend APIs using asynchronous HTTP requests.
- Implemented authentication, input validation, exception handling, and API response management to improve application reliability.
- Used Git for version control and deployed the frontend and backend while testing APIs using Postman during development.

Leadership & Responsibility

Academic Class Representative – Chandigarh University

2024 – 2025

- Represented a cohort of 70+ students and served as the primary point of coordination between students and faculty.
- Collected, organized, and communicated student concerns and feedback while ensuring information was conveyed accurately to relevant stakeholders.

Education

Bachelor of Engineering in Computer Science – Chandigarh University

2022–2026 — **CGPA: 7.66**

Certifications

- [Cloud Computing – NPTEL \(Elite\), IIT Kharagpur \(2024\)](#)
- [Web Application Technologies and Django – University of Michigan \(Coursera, 2024\)](#)
- [Programming for Everybody \(Getting Started with Python\) – University of Michigan \(Coursera, 2024\)](#)
- [Java Full Stack Developer Specialization – Board Infinity \(Coursera, 2025\)](#)
